WORK EXPERIENCE

Senior Software Consultant

10Pearls (Private) Limited

02/2022 – Present • Lahore, Pakistan

- Refactored core services to async/await, eliminating blocking operations and improving application stability and response times.
- Built dynamic camera and microphone switching for live video consultations using PexRTC, with configurable display settings per deployment.
- Upgraded Node.js, New Relic and dependencies across the stack, closing security vulnerabilities and keeping the platform on supported versions.
- Delivered a feature estimated at 160 hours in 77.5 actual hours (under half the estimate) by adopting spec-driven development with OpenSpec alongside Claude and GitHub Copilot, locking requirements into reviewable specs before implementation.
- Owned client-facing requirement gathering and solution design, translating business needs into technical specifications the team could build against.
- Ran issue triage, assignment and progress tracking across tasks, bugs and user stories to keep releases on schedule.
- Delivered Angular.js front-end features that improved interface responsiveness and user interaction.
- Unblocked failing builds and deployments, and lifted organic search visibility through SEO and rendering fixes.

Senior Associate

TAFSOL Technologies (Private) Limited

12/2021 – 01/2022 • Karachi, Pakistan

- Developed REST APIs to expose data for web clients and configured email functionalities based on queues.
- Identified and resolved bugs in the existing system, ensuring data security through AWS S3 bucket policies.
- Collaborated on design and development flows, handling time zone and commission calculations and creating the models and tables required for system functionality.

PROJECTS

Connected RV IoT Platform

Leader in multi-tenant fleet and device management, delivering real-time GPS/sensor telemetry, device lifecycle and subscription management across web and mobile portals to streamline operations and analytics.

Health Care Solution

Leader in telemedicine, providing digital healthcare solutions for remote doctor visits and virtual consultations, expanding healthcare accessibility and advancing telehealth technologies.

Hiring Platform

Prominent digital hiring platform, streamlining recruitment and connecting employers with talent efficiently.

MentGo (Counselling App)

Mentorship platform that connects mentees with mentors, allowing them to book sessions and receive paid life lessons.

Online Medical Learning Platform

Medical video learning platform with restricted downloads, one-device lifetime access and subscription plans for resource availability.

Tour Recommender

Image recognition application that identifies locations from input images.

EDUCATION

BS Computer Science

Gold Medalist

Bahria University, Karachi Campus

02/2018 – 02/2022 • CGPA: 3.9
